

Please do not limit XM radio concerning their Weather and Traffic reports. These broadcasts are important to many areas suffering from tornado and flash flood warnings. I listen to XM regularly and have a vested interest in hearing the weather and traffic reports for myself and family members. On the standard radio stations, the weather and traffic is only at certain times on the hour and may miss key information vital to safety during emergencies. XM has the ability to tune in and get current updates every minute of the hour. It is beneficial for these broadcasts to stay on XM.
Thank you for your time and consideration.
